For your publication to be verified you must provide the ABP research team with the following evidence when submitting this form

Evidence must be supplied showing the following factors:

Innovative software products of commercial quality and offered for sale or distributed as shareware through a publisher or distributor. **Provide a copy of the cover/cd as well as a screen shot from the program or a web site detailing the program. Evidence should show that the item was first made available in 2009 as well as your affiliation to the University of Melbourne.**

Include: • system software (i.e. low-level programs that interact with the computer at a very basic level such as operating systems, compilers and utilities for managing computer resources) • application software (i.e. software that performs a specific task or function such as word-processing, creation of spreadsheets, generation of graphics, facilitating email etc.) • multimedia products (i.e. products that mix text and graphics with additional features such as sound, motion/animation and video to produce advanced human-computer interactivity) • innovative software products designed primarily for undergraduate and postgraduate university students • innovative software products designed for scholars • computer software versions other than the 1st version only if significantly improved

Exclude: • multimedia products with limited human interactive ability (possibly N4) • creative multimedia productions (possibly J12 or J7) • software designed primarily for secondary, primary or pre-school students (excluded completely).
